DESIGN LEADERSHIP

Design strategy, design ops, mentoring & team enablement, stakeholder management, cross-functional collaboration, design reviews

CORE CRAFT

Research

User research, interviews, usability testing, journey mapping, A/B & MAB testing, analytics

Design

Product & interaction design, prototyping, UX writing, design systems at scale

AI for Design

AI-augmented design ops & delivery, custom GPTs & agents, MCP, Claude Code, Figma Make

Responsible Design

Accessibility (WCAG, RGAA), eco-design (RGESN), inclusive design

TOOLS

Figma, Adobe Suite, Storybook, ZeroHeight, Hotjar, Maze, UserTesting, Google Analytics, VWO, HTML/CSS, JavaScript, GitHub

METHODOLOGY

Agile, Scrum, Kanban, SAFe

LANGUAGES

French	Native
English	Fluent
Portuguese	Intermediate

ENGAGEMENT

Since 2025 · GreenIT

Since 2024 · The Shifters

2022 · Designers Éthiques

2022 · Epitech (student mentor)

2019 · Red Cross (volunteer)

Senior Product Designer with 8+ years specializing in complex **SaaS & B2B products**, turning friction-heavy, data-dense experiences into intuitive, high-performing, ethical journeys, with proven consumer-facing range. I pair measurable business impact with design leverage: AI-augmented workflows, scalable design systems, and research practices that make whole teams faster.

- AI-augmented design leadership
- Complex SaaS & B2B
- Measurable outcomes
- Accessibility & responsible design
- Design systems at scale

Experience

Sr Product Designer

Jan 2026 - Present

CoderPad · SaaS technical-interview platform

- Pioneered AI-augmented design ops, owning end-to-end AI integration (custom GPTs, agents, skills, tokens, MCP, plugins, dashboards) that boosted a 3-designer team's output and standardized deliverables from low-fi to high-fi.
- Converted user interviews and data analysis into Figma prototypes that cut friction and accelerated shipping.
- Led design reviews, contributed to tech and QA reviews, and authored playbooks (component accessibility audits, AI-for-design) that scaled best practices across the team.

Product Designer

Jun 2023 - Feb 2025

Dualsun · SaaS & IoT B2B solar platforms

- Redesigned the solar simulator to lift conversion **+14%**, and streamlined IoT mobile-app setup to raise satisfaction and retention across clients and installers.
- Broke a budget-constrained design bottleneck by writing dev tickets, driving tech reviews, and shipping reusable templates that sped up PMs' early discovery by **20%**.
- Trained PMs to run their own user interviews, cutting research time **50%**, and upskilled Marketing, Engineering, and Product teams on Figma.
- Built and scaled a WCAG-compliant design system (Tailwind, Material/Ionic), authored the digital tone of voice, and directed freelancers to enforce cross-platform consistency.

Freelance Product Designer

Jan 2021 - Present

EcoDesign · SaaS, B2B & consumer products

- Led the core-journey redesign of **Wisecure's** geolocated-security product: a consumer mobile app (neighborhood safety feed, community incident map with confirmations/comments, agent-intervention requests, alarm quotes, onboarding) and a supervision web app for city halls.
- Advised **GreenIT** (responsible-tech non-profit) on accessibility, auditing tools and PDFs, improving the donation journey, and co-authoring research on AI's environmental impact.
- Reshaped **HipeKids'** (EdTech) registration journey via UX audit and UX writing, driving **+8%** sign-ups and higher lead quality.
- Shipped **Pleko's** (startup) instant-cleaning mobile app end to end, from concept to launch-ready product.
- Redesigned **Airbus / Alten's** (aerospace, >50,000 staff) production-monitoring dashboard through research-led design, raising retention and adoption **+20%**.
- Turned **UserTesting's** (SaaS) qualitative and quantitative test data into actionable recommendations for clients (Fnac Spectacles, AlloCarrelage).

UX Designer & Developer

2017 - 2020

Orange · Telecom & digital services, VaaS & IoT

- Simplified a Voice-as-a-Service API tool to improve usability and retention, winning **2nd place** at APIdays 2020 with an eco-designed entry.
- Designed the award-winning "Switch Number" app (**1st place**, Orange innovation competition), led R&D delivery as Scrum Master (SAFe), and built the DataShare IoT web portal.

Education

MIAGE - Master, IT & Project Management

Université Paul Sabatier, Toulouse · 2018-2020

MIAGE - Bachelor, Computer Science

Université Paul Sabatier, Toulouse · 2013-2018

Certifications & Awards

- Digital accessibility audit with RGAA · Access42, 2026
- Responsible Digital knowledge certificate · INR, 2025
- Certified SAFe® 5 Practitioner · Scaled Agile, 2020
- Certified SAFe® 4 Practitioner · Scaled Agile, 2019
